Lindsay's Law

LINDSAY'S LAW

What is Sudden Cardiac Arrest?

A Sudden Cardiac Arrest (SCA) occurs when the heart suddenly and unexpectedly stops beating, cutting off blood flow to the brain and other vital organs. Sudden cardiac arrest is fatal if not treated immediately, most often by a defibrillator.

Who is Lindsay?

Senate Bill 252 is named for national heart health advocate and former Miss Ohio Lindsay Davis who suffers from a heart condition and has since dedicated her career to raising awareness of this potentially fatal condition.

"Sudden cardiac arrest is the number one killer of student athletes," said Davis. *"At any moment I could have died because coaches and teachers had no idea this was even a possibility for someone who looked as healthy as I did at that age."*

Lindsay's Law

In accordance with this law, the Ohio Department of Health, the Ohio Department of Education, the Ohio High School Athletic Association, the Ohio Chapter of the American College of Cardiology and other stakeholders jointly developed guidelines and other relevant materials to inform and educate students and youth athletes participating in or desiring to participate in an athletic activity, their parents, and their coaches about the nature and warning signs of sudden cardiac arrest.

PARENTS/GUARDIANS AND YOUTH ATHLETES:

What do you have to do?

- Watch Required video
- Review Required SCA Informational Handout
- Submit Required Signature Form to all Youth Sports Organizations your child participates in once a year

To access the video, handout and signature form please go to www.woosteroh.com/recreation and click on the Lindsay's Law tab.

NOTICE

No child will be placed on a roster for **ANY** sports offered by the Wooster Recreation and Community Center until a Signature Form is on file with our department. If you choose to register online you will **NEED** to turn in a signed form at the Community Center.

What is the Wooster Soccer Association?

WSA is a non-profit, volunteer organization that works in cooperation with the Wooster Recreation Department to encourage and support participation in soccer. WSA strives to provide participants with experiences that build confidence, good health, team spirit, and civic responsibility. Our goal is to reach high standards of good sportsmanship and proficiency in soccer skills. We also wish to foster a sense of mutual support and respect throughout Wayne County's soccer community (recreational, traveling, high school, and college leagues).

What activities are available?

The Wooster Recreation Department organizes clinics for various ages at different times of the year. The association supports and organizes outdoor recreational soccer leagues for children beginning at Preschool and continuing through High School. The association also supports and organizes traveling soccer teams for ages 10 to 13 (U10-U14). Participation in traveling soccer is at the invitation of the coach, and tryouts will be announced when new teams are forming. It is expected that all traveling players will have participated in at least one season of recreational league play before joining a traveling team.

Where are games played?

Recreational games are played at the Soccer Complex on Burbank Rd. traveling teams play in the Northern Ohio region and may travel up to 60 miles for games. Wooster High games are played at Follis Field (and away) and College of Wooster games are played at the College campus (and away).

TAI CHI – QIGONG with Josh Blakeslee

Class Description

Tai chi chuan and qigong are Chinese internal arts focused on generating and channeling internal energy, or qi (pronounced "chee"), throughout the body to generate force and promote health. The movements of tai chi and qigong are smooth, steady and circular. Tai chi and qigong students are trained in breathing exercises, fluidity drills and qi-building exercises. The slower pace and more gentle movements of tai chi and qigong routines make these arts particularly well suited for adults and seniors interested in increasing flexibility, range of movement or lung capacity.

Instructor Biography
