<u> </u>	S			
100				
000				

- A. Enter date as "MM/DD/YY". Enter "Various" to summarize overflows of less than 1000 gallons from an SSO location
- B. Enter the unique identification assigned in Table 1.
- C. Enter name of receiving water. If an SSO enters a storm sewer, enter "SS to (name of receiving water)." If an SSO does not reach a receiving water, enter "None".
- D. Enter estimate of volume in MG (million gallons). Enter estimate of total volume if summarizing data.

Use additional pages as needed.

SSO Annual Report Table 3: Water in Basement Occurrences		Ohio NPDES Permit No.: 3PD00013*RD	
Sewershed ^A	WIB Occurrences	Causes ^C	
Bever	5	D	
Elm	2	D,B	
Little Applecreek	7	D,W,R,B	
Christmas Run	3	R,D	
Killbuck South	3	R,D	
300	10. 200		
Total Occurrences	20		

A. A sewershed is a specific geographic area, such as a city block or a subdivision, that drains to a common outlet.

Use additional pages as needed.

B. Enter the total number of water in basement occurrences report for the sewershed.

C. Enter all causes that apply: W = extreme weather; E = equipment failure; P = power failure; D = debris in line; R = roots; G = grease; B = other blockages; L = Line deterioration; V = vandalism; O = other, prove details.

SSO Annual Report: Water in Basement Narratives	Ohio NPDES Permit No.: 3PD00013*RD				
Enter narrative analysis of WIB patterns by location, frequency and cause.					
Little Applecreek Sewershed had the most water in basements (WIB) in 2018. There were 7 reported WIB in that watershed due to various issues. There were 5 at Bever Street and 2 at Elm watershed both due to lateral debris and other blockage. Christmas Run and Killbuck South each had 3 due to roots and debris. Wooster continues to use a root treatment system along with regular jetting of known problem areas. Wooster has also started a relining project in hopes of reducing I&I and the effects of roots.
