

# City of *Wooster* URBAN FORESTRY

Proud to be one of 3 Ohio cities with the longest-running Tree City USA community designations, now at 43 years!

The Urban Forestry Commission, established by Wooster City Council in 1954, works cooperatively with Wooster City staff to maintain a high quality tree population for continual improvement of our urban environment. Commission members, including several professional arborists, represent all precincts of Wooster.

## *Did you know....*

City of Wooster continually maps and manages over 3,700 city trees.

Annually, the city plants between 150 and 200 trees on city properties.

The Public Properties Maintenance Division staff maintains the city's trees, downtown landscape beds, planters, hanging baskets, and thousands of parkland and forest trees owned by the city. This work continues year-round to keep our city beautiful and safe.

Since 1956, Urban Forestry assists two local service organizations, distributing over 675 dogwood and magnolia trees on Arbor Day to Wooster City Schools' children, grades 1 and 5, for planting at their residences.

Since 1956, Urban Forestry assists two local service organizations in the annual distribution of over 675 dogwood and magnolia trees on Arbor Day to Wooster City Schools' children, grades 1 and 5, for planting at their residences.

## *Homeowners Take Note*

Street trees (*between sidewalk and street*) are planted and maintained by the City of Wooster. Homeowners may not plant, prune, or remove City trees on tree lawns. Questions related to "tree lawn trees" should be directed to the Supervisor of the Public Properties Maintenance Division.

*Your interest and questions are always welcome!*
