

Storm Sewer Rates Effective 6-1-2011

The basic unit of service for the storm sewer utility is 3,050 square feet of impervious surface (ESU). The current rate for the storm sewer utility is \$5.75 per ESU.

Residential properties in R-1 zoning districts are charged for one ESU. Sixty percent (60%) of one basic service unit (ESU) is the equivalent service charged for one- and two-family residential properties in R-2, R-3, R-4, R-5 zoning districts. All other properties are billed for the number of basic service units of 3,050 square feet of impervious surface as calculated by the City Engineer's office.
